VIRTUAL
CISO

Powerful Leadership

Protexity's vCISO service empowers your organization to achieve its cybersecurity goals. With a team of seasoned security professionals and a wealth of industry experience, our virtual CISO service can help your business overcome its unique challenges and seize opportunities.

We take the time to learn about your organization, its cybersecurity goals, challenges, and constraints. This positions us to develop a tailored strategy most suitable for your organization. Our objective is to provide lasting value and help you maximize your security ROI.

Strategic Planning
Developing and executing strategies that achieve security goals.

Security Program
Development of a security program to govern corresponding initiatives.

Policies & Procedures
Policy and procedure development aligned with security goals.

Incident Response Plan
A plan outlining appropriate responses to security incidents.

Security Efficiency
Streamlining processes and improving operational effectiveness.
